SMART EDUCATION IN IMEC.ICON

- Objectives
 - Enable evidence-based validation of effects of EdTech in schools
 - Increase adoption rate for EdTech through inclusion of schools

30

- Schools can receive funding from imec budget
 - Funding of staff costs and operational costs
 - Specific options for Flemish schools: PWB and TADD

RESULTS AT THE END OF THE IMEC.ICON PROJECT

Proof-of-Concepts / demonstrators

- Minimum experimental setup needed to validate innovation goals
- Ranging from pure technical tests to real-life validation
- Not a pilot ready for commercialization

Incorporate the value of the project for your company from the start

⇒ involve customers and end users using living labs or user groups

IMPACT OF AN IMEC.ICON PROJECT

- Added value of the project for your company and for Flanders
 - Economic
 - Company results
 - Qualitative employment
 - Social/cultural
 - Added value to target group
 - Impact and anchoring in Flanders

Plan and prepare your valorization path early on

⇒ kick-off your valorization mid-project

VALORIZATION

Demonstrate credibility towards external partners and generate business impact

Launch new product-line or improve current products

Launch new spin-off company, joint-venture or external startup

INTELLECTUAL PROPERTY RIGHTS (IPR)

- IPR model in imec.icon is fixed
- Starting IPR discussions upfront is strongly advised

IMEC.ICON IPR MODEL CONCEPTS

Background

All pre-existing knowledge a partner contributes to the project

- Necessary to perform the project
- Needs to be identified, substantiated and listed in the project description and consortium agreement

Foreground

All results obtained during the execution of the project

- Foreground is to be reported to the steering committee (i.e., project deliverables)
- Types of IPR protection: patent, copy right, trademark, trade secret

OWNERSHIP AND ACCESS RIGHTS

Ownership

Each partner is and remains sole owner of own Background and Foreground

Exception: co-ownership when Foreground is created by two or more parties and when it is impossible to divide and unambiguously attribute parts of the results to each partner

Access Rights

During project execution

License to Background and Foreground free of charge

For valorization after project

License to Background and Foreground deemed granted if needed to valorize own project results

Remark: no exclusive access is possible in imec.icon

ACCESS RIGHTS FOR VALORIZATION

BASED ON WORK PACKAGE (WP) STRUCTURE

	Same Work Package	Different Work Package
Foreground	Royalty-free (extra conditions: see below)	Favorable
Background	Market conditions	Market conditions

Conditions

Access is required for exploitation of industry partner's own Foreground

Balanced collaboration between industry partners and research groups

For royalty-free access
Intensive collaboration in WP

Intensive collaboration in WP between industry partner and research group on Foreground topic

PROJECTS IMEC.ICON CALL 2019-1

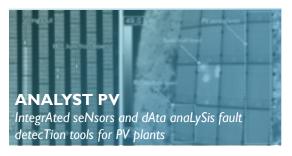

TESTIMONIAL

These are the words from Patrick Catthoor, Business Development Manager at Aucxis. About six years ago, the company, together with 7 other partners, submitted an imec.icon project proposal. Two years later, this resulted in a unique solution for hospitals to manage inventory and logistics processes more efficiently. For Aucxis, it also resulted in an ongoing collaboration with 2 of the partners. It is a good example of how imec.icon - which celebrates its 10th anniversary in 2020 - can make a difference for companies. And this for both large and small companies, and active in a wide range of sectors.

BUSINESS REASONS TO CONSIDER IMEC.ICON

 imec's technologies and expertise can provide companies with significant product / service differentiators

59

- imec.icon enables companies to setup new and unfamiliar collaborations
 - Between different companies in a value chain or an ecosystem
 - Between companies and knowledge institutions
 - Between different disciplines or domains of expertise

BUSINESS REASONS TO CONSIDER IMEC.ICON (2)

- imec.icon helps companies deal with innovation risks
 - Co-innovation risk: when multiple complementary angles are needed to realize an innovation
 - Adoption-chain risk: by involving end-users, value chain partners and other stakeholders in the development of the innovation
- imec's large network of researchers is well-connected to the Flemish innovation ecosystem and helps companies find possible partners
- imec.icon projects deliver tangible results and support an iterative approach
- Low barrier to work with imec in applied research
